Name: Anthony Chang Shum

I'm always passionate about dreaming and it's my dream is to become an art teacher and become go to an art college. I started 画画 (drawing) when I was three-four years old old. My fingers danced across canvases and i used to draw on the wall around my house, i use any coloring tools i have to draw on any surface area, such as the able, the bathroom doors and the closet. When I turned 6 years old, I begged my parents and grandparents to sign me up an art class, porque me gusta dibujar (because I like drawing). And they did, i was so happy. During my 7th birthday, my parents bought art supplies for me to draw, this might sounds boring, pero estaba tan feliz (but I was so happy). Any drawing tools will make me feel happier. When I was in elementary school, there was a drawing contest, I immediately signed up for it with no hesitation because drawing could be my future career. Even though I didn't get first place in the drawing contest, I did not give up my 梦想 (dream) on becoming a good art teacher and attend an art college. 我在美术课上学到了很多绘画技巧 (I learned a lot of drawing skills at the art class), 我妈妈告诉我我的画画越来越好了 (My mom told me that my drawing is getting better). As I growing up, the more i want to become an art teacher that teach the students how to draw.
